Specifications & Bid Pricing Sheet attached.

Electronic Article Surveillance (EAS) System

The Gateway Center requires an Electronic Article Surveillance (EAS) system designed to reduce lost and theft of various technologies and valuable assets such; iPADS, tablets, laptops, interactive devices. The system will be installed at four (4) doorways in the facility and used to monitor the use inside of the building of multiple technology items. The system should include tags that can attach using different methods to devices and other items. Also the system should provide reports on alarms, traffic flow, and activities by time of day. The EAS systems should be designed, engineered and manufactured for superb detection performance, durability, ease-of-use, and aesthetics to match any décor. With innovative acousto-magnetic (AM) technology supporting system operations and reduction of false alarms. The overall system should the ability for inbuilding advertising using the panels at each entrance. The following chart provides a “basis for design” information on the types, quantities and quality level required for the project. However the contractor may propose other manufacturer equipment that is an “approved equivalent” to the items listed. All requests for substitutions must be presented for approval by the designer and contain all documents to support the request and clearly show the technical specifications for the proposed equipment.

Unit Item	Item #	Unit Name/Description	QTY	Manufacturer - Basis of Design	Part Number - Basis of Design
		Electronic Article Surveillance (EAS) Solution			
1001		Detection Systems			
1002		1175 Dual 2.0M w/9060-Gray 12M	3	Sensormatic / Tyco	ZASE-E20G2-12M
