

## Request a Presentation

Presentations can be emailed or presented live by the City's environmental coordinator. Environmental education spans further than the blue recycling bin. Our citizens and students are excited and eager to learn about recycling and environmental stewardship in Tuscaloosa and West Alabama.

Presentation Title	Description
Recycling in West Alabama	A look at the city of Tuscaloosa's state-of-the-art recycling plant, recycling programs, and the City's environmental goals. (Available Spring 2014)
Why We Recycle: Looking Inside a Landfill	When you throw something away, where does it go? This presentation is a basic overview of landfill science and examining how wasteful our society has become.
Economic Impact of Recycling and Sustainable Living	Recycling makes "cents". This presentation takes a best management approach to recycling and exploring why environmental stewardship has moved to the forefront of most schools, businesses and our homes.
Your Future: Environmental Sciences	This presentation is geared toward students who are unsure about what career path to take after high school. Environmental sciences (including: engineering, geology, biology, chemistry, etc.) are among the most sought after, dynamic, and highest paying jobs worldwide.
Starting a Recycling Program at School/Business	A step by step guide to starting your own recycling program at home/work/school in West Alabama.
Recycling and Environmental Sustainability	The backbone to why solid waste management is necessary and how you can help make sure our local community stays clean and green!
