

Code Update Process – Zoning Ordinance and Subdivision Regulations

Adopted 3/21/22, Revised 5/16/22, Revised 12/19/22

Process

The process for the Code Update meetings will be very similar to the process for the Framework adoption.

The Zoning Ordinance Updates will occur in two parts:

1. Zoning Text
2. Zoning Map

The Zoning text discussions will happen without discussions of “where.” Once the text is adopted, we then get into the process of changing colors on the map, fully understanding what regulations will be in place.

During the zoning text discussions, we will discuss purpose and intensity/dimensional standards without first talking about permitted uses. Discussions on uses will come at the end of the process.

Subdivision regulations will occur towards the end once minimum lot sizes have been established and other open space/lot standards.

Meetings Generally

Similar to the Framework adoption process, all Steering Committee members will note their role in the process (state they were a Steering Committee member at the podium/on record if providing public comment).

Planning and Zoning Commission members will be familiar with Framework, specifically the land use character types, in advance of the meetings. They will refrain from arguing with public commenters and will listen, ask questions only if they don't understand and need further clarification, be respectful, and desire an expedited process.

The meetings will begin at 5pm and end promptly at 7pm if they do not adjourn before. If a topic is not finished, it will roll into the next scheduled special called meeting.

Aside from meetings that may be noted as virtual only, all meetings will be held in the City Council chamber with the aforementioned participation opportunities.

PLANNING

A timer will be used and visible to all parties for public comment. We will recommend to the Commission that two-three minutes per speaker will be used for public comment, and only the PZC members can grant a specified time extension. Zoom callers will be allowed to finish their thought before they are muted.

Staff will manage the flow of the meeting and meeting agenda for efficiency.

Stakeholder Groups

To be accountable, stakeholder groups will be engaged continuously in this process. Not every group will be concerned with every section or topic, so we will target specific groups on a topic-by-topic basis.

Special Called Framework

Individuals will be able to participate in three ways: written comment online/emailed, virtually (Zoom), or in-person in Council Chambers.

Sections of the code will be put on the Framework website for review prior to meetings. The public will be able to provide virtual comments and in-person comments on the code sections. Virtual comments will be handled similarly to the map – people can submit post-it notes in portions of the code they have questions over or need clarity on.

Administration and Policy Committee

Topics will appear before the City Council's Administration and Policy Committee once they've been recommended for approval by the PZC. No firm dates are established in the proposed timeline, but Committee dates are noted for convenience and planning.

Regular PZC Meetings

An option exists for the Commission to hear minor topics for 30 minutes to an hour at the beginning of their regular meetings. The commission may ask to employ this option for some smaller topics that need to be finalized.

The following timeline is proposed, following a (generally) Wednesday meeting schedule. There are four different meeting types noted, along with City Hall closures and other dates of importance:
